Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Research on Crystal Growth and Characterization at the National Bureau of Standards January to June 1964 This is the fourth biannual report on crystal research at the National Bureau of Standards. The three preceding ones have been published as nbs Technical Notes and 236. These publications present the background of the nbs effort in this area. Much of the work described here is carried out with the support of the Advanced Research Projects Agency. In anticipation of future technological demands in crystal and material science, arpa is encouraging the nbs to study the techniques and theory of crystal growth, to characterize precisely the crystals produced by various methods, and to extend precision measurement to physical and chemical properties of crystals. The Bureau s own program in many aspects of this field is extensive and no effort is made in the research descriptions below to separate the two efforts. Only in the few instances in which financial support from other agencies contributed to the program is an acknowledgement given. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
