

An Elementary Treatise on Curves, Functions, and Forces

Filesize: 6.97 MB

Reviews

Extremely helpful to all class of individuals. It really is written in straightforward terms instead of difficult to understand. I am just happy to explain how this is the finest publication I have got read inside my own lifestyle and might be the very best ebook for possibly.
(Dr. Meta Smith)

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1852 edition. Excerpt: .is then reduced to $Bt Vl + Ct - + M1 = 0$. (307) 194. Scholium. If A, is zero and H, is not so, b and c can satisfy equations (256) and (287), and a can be taken to satisfy the equation so that (283) is then reduced to $-Bi?! +Ci l + \#i^2 = 0$. (308) 195. Scholium. If A1 and J3, are zero, c can be taken to satisfy equation (287), and if either lf, or 7, is not zero, a or can be taken to satisfy the equation $M, = 0$, so that (283) is then reduced to $C, + Ht x^2 + 7, y^2 = 0$. (309) But if both if, and l, are also zero, (283) becomes $C, + M1 = 0$. (310) 196. Scholium. If the values of 4, B1, C, and Mt have all the same sign, (288) is impossible, and there is no locus. Cases of quadratic locus in space. called the axes of the surface in either of the three last articles, so that the three different values of which are found from equation (304), are the semiaxes. 201. Scholhim. If Ml is zero, the equations (311), (313), and (315) are impossible, but in this case (288) becomes $A, x + B, y + C, z = 0$. (317) 202. Scholium. If A1, B1, and C1 have all the same sign, (317) is only satisfied by the values $x^2 = 0, y^2 = 0, z^2 = 0, \dots$
